Hi Deke & Corrin,

The applicants are required to apply erosion control measures (straw wattles, silt fencing) prior to issuance of permit. I will tell them to remove the trash heap or to contain it in a dumpster.

The permits for Lots 9-11 have not been issued yet, pending approval of a detailed description of grading and erosion control operations. The applicant's plan at this time is to start on Lot 9 and 10 when the permits are issued and start Lot 11 in the spring.

I will let you know when permits are issued.

Thanks

Hi Camille,
Our anxious neighbors have reported seeing straw wattles, silt fencing, denuding of the area and a large (fire ready) trash heap, at the end of Cobblehill.
Cowpens, not so much trash.

We are all very worried about landslides with the first rains especially after the Seneca slide.

Does this mean that the Permit has been issued ? When ?

If it hasn't been issued could you please notify us whenever it is issued.

Thank you-
Deke & Corrin Brown
