Re: PLN2021-00478: Coastside Design Review Permit, Coastal Development Permit (CDP), and Variance for construction of a new 1,670 sq. ft. three-story single-family residence with an attached 371 sq. ft. garage and a 791 sq. ft. Accessory Dwelling Unit (ADU) on a legal 7,070 sq. ft. parcel associated with a hearing-level CDP and Variance. The Variance is being sought to allow a reduced front yard setback of 3 feet where 20 feet is the minimum allowed due to the site's location within a portion of the Montecito Riparian Corridor and associated 30-foot riparian setback. APN 047-105-020. Address: 779 San Carlos Avenue, El Granada. The project is appealable to the California Coastal Commission.

Dear Camille,

As the owner of the adjacent property at 771 San Carlos Ave, I write to object to the above-referenced project for the following reason:

The proposed building would not respect the riparian zone boundaries and appears to come within 15 feet of the riparian zone boundary as evidenced by the "drip line" of the healthy arroyo willow canopy which is adjacent to, and in some cases extending into, the site. A minimum 30-foot buffer is required. Once the story poles went up in the fall, visual inspection made it obvious that the plans incorrectly place the riparian boundary.

I suspect that the reason for the discrepancy is that the original biological survey was done relatively close to the time that the land had been illegally cleared. The surveyor had to estimate the likely footprint of the mature willows. That estimation is no longer necessary since in the intervening years the willow thicket has re-established itself.

This objection is relevant to the architectural review, since it halves the allowable width of the structure.

The following are Google Earth imagery and photographs to support my objection. Although not a professional botanist, I am a long-time resident with an undergraduate degree in botany and am capable of identifying arroyo willow in any season.

## Klein Objection

Richard Klein, 771 San Carlos Ave, El Granada

### Google Earth Aerial Overview

*Exhibit A. This screenshot shows the parcel at 779 San Carlos with the healthy willow thicket covering the riparian area, below which several branches of San Agustin Creek (aka Montecito Creek) meander. The perspective is downhill from San Carlos Ave looking toward Balboa, where a row of sandbags and many ad hoc drains attest to the frequent winter flooding at the site. The numerals 1 and 2 indicate the approximate location of the photographs I took in the fall of 2024 and the winter of 2025. Our house (771) is on the left. Image captured Richard Klein February 9, 2025.*

Klein Objection

Photos from numeral 1 showing that willow dripline extends about three feet onto the lot near San Carlos Ave.

*Exhibit B. My wife, Kathy Klein, stands at the property line (numeral 1 in the overview) with a measuring tape. Note the story poles to the left. The end of the measuring stick marks the dripline of the willow canopy, marked with red tape. It is clearly only about 15 feet from the willows to the proposed house. Photo Richard Klein September 28, 2024.*

*Exhibit C. Closeup of the willow canopy behind Kathy with the red tape on a willow branch. Photo Richard Klein February 8, 2025.*

Photos from Numeral 2 showing sandbags, wetland vegetation, multiple drains, and the main creek channel

*Exhibit D. Sandbags on Balboa, ready for winter rainfall. Our tiny dog Charlie for perspective. Willow trees and horsetail in the vegetation on the right. Photo Richard Klein February 8, 2025.*

Klein Objection

*Exhibit E. San Agustin creek just before diversion into underground culvert at Balboa. Willow trees, ferns, and lush vegetation. The creek empties into the harbor next to Barbara's Fish Trap. Photo Richard Klein February 8, 2025.*

Photo from developer's application showing "Left View" of story poles with willow thicket in background

*Exhibit F. Photo taken from application shows the story poles in the foreground and the nearby willow thicket behind. The willows in background right are at approximately the location of numeral 1. Photo unknown photographer and date between September and January.*

Klein Objection

*Photos of the lot and the adjacent willows from our family room.*

*Exhibit G. View from our family room with story poles in foreground and willow branches almost touching rear of structure. Photo Richard Klein September 28,2024.*

Klein Objection

*Exhibit H. First photo looks toward numeral 1 on the street. Second photo looks straight out from our window to the willows, with a small amount of uncleared French Broom in the foreground. The willows are just starting to show their new leaves and catkins. Photos Richard Klein February 9, 2025.*
